Engine Diagnostics Checklist

Bring this printable checklist with your vehicle so we can diagnose engine faults faster and avoid unnecessary parts replacement.

Vehicle details

- ☐ Vehicle registration and current mileage
- ☐ Make, model, engine size and fuel type if known
- ☐ Any warning-light photos or dashboard messages

Service and repair history

- ☐ Service book, digital service record or recent oil-service details
- ☐ Previous repair invoices and parts fitted
- ☐ Timing belt or chain history, if available

Symptoms to note

- ☐ Noises such as knocking, rattling, ticking or grinding
- ☐ Smoke colour, overheating, coolant loss, oil leaks or oil pressure warnings
- ☐ Starting issues, power loss, rough idle, misfires or stalling
- ☐ When the fault happens: cold, hot, idle, under load, motorway or short trips

Before your visit

- ☐ Do not clear fault codes before diagnostics
- ☐ Leave warning lights active where safe to do so
- ☐ Tell us if oil, coolant or fuel consumption has recently changed

If the engine is overheating, knocking, smoking heavily or losing oil pressure, contact us before driving in.
